Patent Abstract

GER 1999-07-15 29902593

ANNOTATED TITLE- Gasanalysator foOr die medizinische Diagnostik

NO-AUTHOR

APPLICANT- GENZYME VIROTECH GMBH DE

PATENT NUMBER- 29902593/DE-U1

PATENT APPLICATION NUMBER- 29902593

DATE FILED- 1999-02-13

DOCUMENT TYPE- U1, UTILITY MODEL

PUBLICATION DATE- 1999-07-15

INTERNATIONAL PATENT CLASS- A61B00508; A61B00500;

G01N03348; G01N033497; G01N03358; G01N03366;

PATENT APPLICATION PRIORITY- 29902593, U

PRIORITY COUNTRY CODE- DE, Germany, Ged. Rep. of

PRIORITY DATE- 1999-02-13

FILING LANGUAGE- German

LANGUAGE- German NDN- 203-0433-4434-0

EXEMPLARY CLAIMS- 1. Gas analyzer for the medical diagnostics, thereby characterized that it is equipped with gas sensors to the proof by gaseous substances, those the characteristic, gaseous substances set free with an illness from firm, liquid or gaseous body eliminations or from cultures of pathogenen exciters or parasites seize and into signal samples convert, which are compared with the characteristic signal samples stored before in a data base by when well-known illnesses by pathogene exciters or parasite developing gaseous substances and zielt identif and so that a medical diagnosis to make possible. 2. Gas analyzer according to requirement 1, by the fact characterized that it is equipped with gas sensors for the diagnosis of an infection with Helicobacter pylori, which seize and into an appropriate signal sample convert ammonia existing at the time of execution of the breath test in the breathing air, which is compared with the signal

BEST AVAILABLE COPY

sample stored before in a data base by ammonia and so that a diagnosis makes possible over a any infection with *Helicobacter pylori*. 3. Gas analyzer according to requirement 1, by the fact characterized that it to the diagnosis a lactose-intolerance isequipped with gas sensors, which the water-material contained in thebreathing air seize and into an appropriate signal sample convert, which is compared with the signal sample stored before in a data base by hydrogen and with it a diagnosis over a any lactose-intolerance made possible. 12.02.99 X G 39 G 4. ' "*"..*. : *..: : ': : J i: 10-KEIL&SCHAAFHAUSEN 4. Gas analyzer according to requirement 1, by it characterized that it is equipped with gas sensors, those with EnzynunaengelIn, bacterial or viralen infections or parasite infestation from body fluids or body eliminations or from appropriate cultures of micro organisms formed gaseous substances seize and into asignal sample convert, which is compared with the signal samples stored before in a data base and so that a diagnosis makes
